

## Living On A Chicken Farm

For the first audio project idea, I would like to interview my grandmother who owns and live on a chicken farm. For the background soundscape I will record the sounds of 70 - 80 chickens and roosters as well as the surrounding sounds of living on a farm on a beach. I will use free audio sounds or music to fill parts of the audio project, or maybe use for shorter hits. I also want to interview my grandma who runs the chicken farm or maybe my partner, who also lives on the farm at the moment. I may add some extra wind sounds if I can get a good sound of the forest, and maybe some gentle rolling waves on a beach.

The duration may be 2-4 minutes.
